EDUCATION

Maulana Azad National Institute of Technology (NIT Bhopal)

Bachelor of Technology

Bhopal, India

July 2019 - June 2023

EXPERIENCE

Tekmindz

Software Engineer

Noida,U.P

Jan 2026 - current

- : Designed and implemented an **OCPP 1.6** protocol service for SparkE's in-house EV charging management system, connecting **500+** **charging stations** with the central platform and handling charger status, transaction processing, remote operations, and charging-session lifecycle events.
- : Built a **Corporate wallet and authorization system** for SparkE, enabling **1,000+** **corporate drivers** to charge using company-funded wallets with configurable spending limits, driver-level validations, balance checks, and transaction authorization.
- : Developed an end-to-end **EV charging reservation system** for TVS Motors, handling **10K+** **bookings** with station and slot availability, booking lifecycle management, cancellation policies, conflict validation, and automated invoice generation.
- : Architected a **real-time communication websocket service** for TVS Motors' EV charging infrastructure, enabling low-latency exchange of charger events, transaction updates, and charging-session state changes between charging stations and the central platform.
- : Designed an event-driven **notification system** for TVS Motors, processing **50K+** **notifications/month** across Email, SMS, and WhatsApp with asynchronous processing, message routing, retries, and fault-tolerant failure handling.
- : Engineered a **real-time video conferencing platform** using **cloudflare** realtime kit supporting **100+** **concurrent participants**, delivering reliable video/audio communication, session management, and real-time collaboration.

UnbiaslyAI

Software Engineer

Delhi,India

Jun 2024 - Sep 2025

- : Led the development of **RESTful APIs** for a news aggregator app using Node.js, integrating multiple third-party news APIs for real-time updates. Implemented **AI-based models** to aggregate news, providing users with relevant and personalized content.
- : Built a scalable notification service using **BullMQ**, efficiently handling high volumes of user notifications for breaking news and updates without compromising performance.
- : Optimized **REST APIs** across web and mobile platforms, reducing average response time from **200 ms to 20-30 ms** through query optimization, database indexing, and **Redis** caching..
- : Insured system reliability by monitoring server health through **AWS CloudWatch**, setting up auto-scaling, load balancing, and proactive alert mechanisms to detect and resolve issues quickly.
- : Implemented a **Role-Based Access Control (RBAC)** system with role creation, permission management, and middleware for secure access control. Developed APIs for user-role and permission assignments, including fine-grained permission control.
- : Oversaw **backend operations**, including server **deployment**, **API performance optimization**, and **database management**. Improved API speed and **system scalability** by optimizing queries and implementing **Redis caching**.

ByajBook

Full Stack Developer

Remote

Jan 2023 - May 2024

- : Integrated secure **payment gateways** (PhonePe, Easebuzz, Razorpay) using **Node.js**, ensuring smooth transactions with top-tier encryption for smooth, secure transactions. Employed **server-to-server** callback authentication for enhanced security and reliable communication.
- : Integrated third-party APIs such as Augmont and Finbii to enable seamless digital gold buy/sell transactions, including real-time gold price retrieval and secure transaction handling.
- : Proactively resolved **API** issues by leveraging logging tools like **Winston**, implementing **caching with Redis**, and **indexing database queries**. Achieved a **40 percent** boost in query performance and reduced **vCPUs** from 8 to 4, enhancing response times and scalability.
- : Ensured server health by monitoring with **AWS CloudWatch**, implementing **auto-scaling**, **load balancing**, and setting up alerts for administrators. Analyzed logs and metrics to address system risks and bottlenecks promptly.

SKILLS SUMMARY

Languages: Javascript, Typescript, C/C++.

Frameworks: React js, Angular js, Node js, Express js, Nest js

Tools: Docker, Git, Github, Swagger, New Relic, Postman, Queue, BullMq, Grafana, Jenkins, Kafka

Database: MySQL, PostgreSQL, MongoDB, Redis, SQLite.

VOLUNTEER EXPERIENCE

Indian Society For Technical Education

Conducted online and offline technical, soft-skills training impacting over 3000 students.

Manit, Bhopal

Think India MANIT Chapter Bhopal

Conducted different workshops and organised events, completing them successfully.
